## **■ MSES LTD – Company Manual Schedule**

**Company Name:** MSES LTD

**Motto:** *Eco-efficient Mechanical & Electrical Engineering*

---

### **Company Introduction**

**MSES LTD (MEP Service and Equipment Solutions)** is a forward-thinking engineering company based in Kigali, Rwanda, specializing in delivering **eco-efficient mechanical and electrical engineering services**. With a strong commitment to sustainability, quality, and innovation, we serve residential, commercial, and industrial clients with tailored MEP (Mechanical, Electrical, and Plumbing) solutions that meet modern energy, safety, and comfort standards.

Guided by our motto “*Eco-efficient Mechanical & Electrical Engineering*”, we strive to lead the industry by integrating **green technologies**, **smart automation**, and **preventive maintenance strategies** into all our projects. Our dual expertise in both mechanical and electrical systems sets us apart, enabling us to provide faster, smarter, and more cost-effective solutions without heavy reliance on subcontractors.

Our dedicated team of certified professionals combines technical mastery with a deep understanding of our clients' unique needs, ensuring each project we undertake is efficient, sustainable, and future-ready. Whether it's installing solar and generator systems, optimizing HVAC and electrical systems, or deploying advanced fire and security solutions

**MSES LTD stands as a reliable partner for quality and performance.**

### 1. Mission Statement

**To deliver high-quality, eco-efficient mechanical and electrical engineering solutions that meet the evolving needs of residential, commercial, and industrial clients. We are committed to innovation, sustainability, and service excellence.**

---

### 2. Vision Statement

**To become the most trusted and forward-thinking provider of sustainable MEP (Mechanical, Electrical, and Plumbing) engineering services in the region, setting new standards in energy efficiency, safety, and client satisfaction.**

---

### 3. Core Values

#### 1. **Eco-efficiency**

We prioritize sustainable technologies and energy-saving systems that benefit both the client and the planet.

## 2. **Excellence & Quality**

We aim to exceed expectations in all our installations, designs, and services, ensuring safety, durability, and performance.

## 3. **Integrity**

Honesty and transparency guide our decisions and relationships with clients, partners, and communities.

## 4. **Innovation**

We embrace modern technologies and smarter engineering practices to provide cutting-edge solutions.

## 5. **Customer Focus**

Every project is built around the client's needs, we listen, understand, and tailor solutions accordingly.

## 6. **Teamwork & Professionalism**

We foster collaboration among our skilled engineers, technicians, and clients for successful project outcomes.

---

## 4. **What Makes MSES LTD Unique?**

### 1. **Green Engineering Focus**

Unlike many traditional MEP service providers, **MSES LTD** integrates **eco-efficient systems** into every project, reducing energy usage, lowering long-term costs, and supporting global climate goals.

### 2. **Dual Expertise (Mechanical + Electrical)**

We bring **combined mastery in both mechanical and electrical systems**, enabling smoother coordination, faster installations, and fewer subcontractor dependencies.

### 3. **Tailored Smart Solutions**

We design **custom-fit solutions** for modern buildings using smart sensors, energy monitoring systems, and automation, giving our clients smarter control and greater comfort.

#### 4. Preventive Maintenance Plans

Our after-installation service goes beyond basic support, we offer **scheduled maintenance** and **system diagnostics** to prevent failures before they happen.

#### 5. Quality Equipment & Certified Staff

We only use **international-standard equipment** and employ **certified professionals** with deep field experience, guaranteeing reliable results.

---

#### 5. Services Offered

- Electrical System Installation & Maintenance (industrial, commercial, domestic)
  - HVAC (Heating, Ventilation & Air Conditioning) System Installation
  - Generator & Solar System Integration
  - Plumbing and Water Management Systems
  - Fire Alarm & Security System Setup
  - Energy Audits & System Optimization
  - Preventive Maintenance Contracts
-
